PURPOSE

Local Planning Policies assist the local government in making decisions under the Scheme.

It is not intended that a policy be applied rigidly, but each planning application be examined on its merits, with the objectives and intent of the policy the key for assessment. However, it should not be assumed that the local government, in exercising its planning discretion, will be limited to the policy provisions and that mere compliance will result in an approval.

The Shire encourages applicants to produce innovative ways of achieving the stated objectives and acknowledges that these may sit outside the more traditional planning and architectural approaches. In these instances, the local government is open to considering (and encourages) well-presented cases, during pre-application consultation, having due regard to the outcome of any public consultation undertaken and the orderly and proper planning of the locality.

POLICY

A Local Planning Policy is not part of the Scheme and does not bind the local government in respect of any application for planning approval but the local government is to have due regard to the provisions of the Policy and the objectives which the Policy is designed to achieve before making its determination. The Scheme prevails should there be any conflict between this Policy and the Scheme.

OBJECTIVES

1. To provide development standards for outbuildings specific to the Shire of Three Springs, as appropriate.
2. To provide a clear definition of what constitutes an “outbuilding”.
3. To ensure that outbuildings are not used for habitation, commercial or industrial purposes by controlling building size and location.
4. To limit the visual impact of outbuildings.
5. To encourage the use of outbuilding materials and colours that complement the landscape and amenity of the surrounding areas.
6. To ensure that the outbuilding remains an ancillary use to the main dwelling or the principle land use on the property.

DEFINITIONS

‘Outbuilding’ means an enclosed non-habitable structure that is detached from any dwelling. For the purpose of this policy an open sided, roofed patio completely detached from the dwelling is also considered an outbuilding. For the purpose of this policy a non-enclosed addition to an existing outbuilding (e.g. veranda, patio, lean-to or carport etc.) shall constitute an extension to that outbuilding.

‘Front Building Line’ means the closest point of a house to the front boundary, drawn parallel to that boundary. In the case of a corner lot, the front building line applies to both streets.

POLICY PROVISIONS

General

1. Pre-fabricated garden sheds, “cubby houses”, kennels and other animal enclosures (such as aviaries, stables) less than 9m² in total aggregate area and less than 2.5m in height (measured from natural ground level) are exempt from this policy provided they are located to the rear of the house, and of a design and colour considered in keeping with the amenity of the area by the local government.
2. Other than for general storage and/or agricultural purposes an outbuilding shall not be used for any commercial or industrial use without prior approval from the local government.
3. The storage of accumulated personal items and any items in connection with a commercial or industrial operation (e.g. building materials, earthmoving equipment etc.) is considered contrary to the objectives of this policy and is therefore not considered sufficient justification for an increase in the maximum standards prescribed.
4. **Development approval for an outbuilding is not required within the ‘Rural’ zone where the Scheme development standards and requirements for the zone are satisfied, and the development is not located in a place that is -**
 - (a) a heritage-protected place; or
 - (b) designated as a bushfire prone area by the Fire and Emergency Services Commissioner.

Height, Size and Setbacks

Outbuildings within the Residential zone shall;

- (a) be single storey;
- (b) be located behind any dwelling on site;
- (c) meet all setback requirements set out in the Local Planning Scheme and this policy;
- (d) not be approved by the local government on a lot not containing a dwelling;

The following maximum standards apply to outbuildings:

Table 1 - Site Layout Requirements

Zone	Maximum area	Maximum wall height*	Maximum roof height*
Rural	Exempt from the area and height requirements of this policy		
Rural Residential	240m ²	4.5m	5.5m
Residential & Rural Townsite	80m ²	4m	5m

(* Heights to be measured at natural ground level)

Consultation

Applications that propose variation to any part of the Policy may require consultation with effected owners and/or occupiers, by means of the Shire writing directly to the surrounding landowners inviting comment, and placement of an advisory sign on-site for a period of not less than 14 days, prior to the application and any received submissions being placed before a meeting of Council for consideration.

Notes: The advertising of a received application that proposes variation to any part of the Policy is undertaken to make the proposal available for inspection in order to provide opportunity for public comment and it should not be construed that final approval will be granted.

The local government in determining the application will take into account the submissions received but is not obliged to support those views.
